

Improving power factor and
enhancing power quality of your network.

Low voltage capacitors CLMD

Enhancing power quality and energy efficiency

Applications in several areas of the power value chain

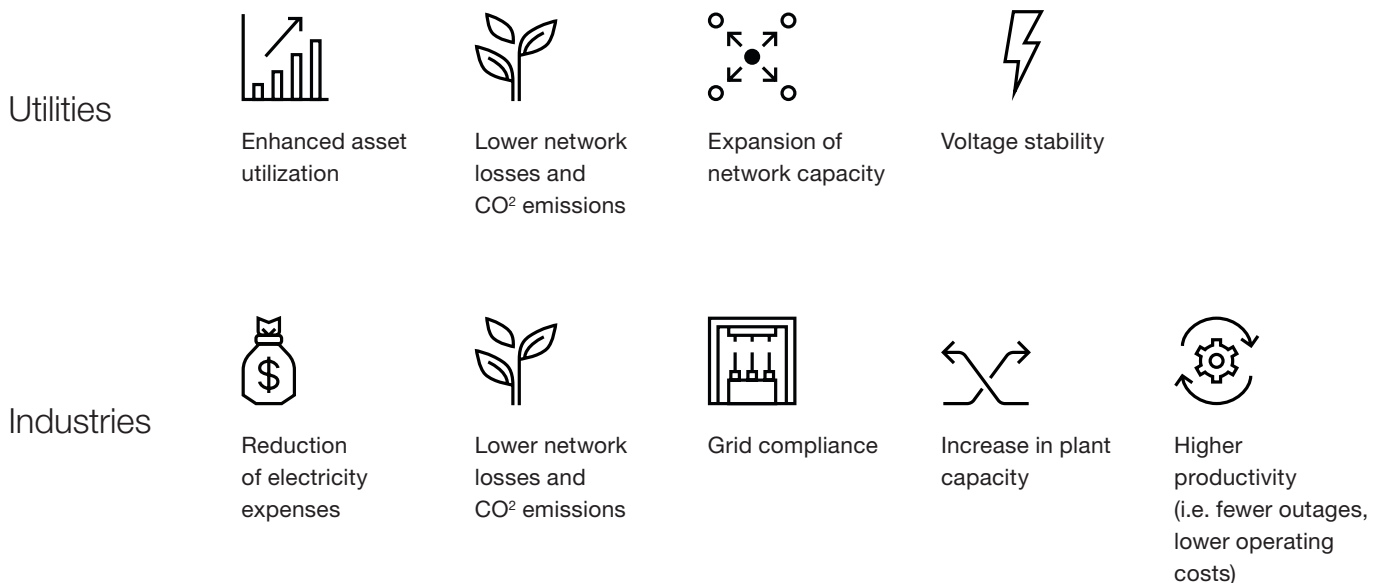

Hitachi Energy is a global technology leader that is advancing a sustainable energy future for all. We serve customers in the utility, industry and infrastructure sectors with innovative solutions and services across the value chain. Together with customers and partners, we pioneer technologies and enable the digital transformation required to accelerate the energy transition towards a carbon-neutral future. We are advancing the world's energy system to become more sustainable, flexible and secure whilst balancing social, environmental and economic value. Hitachi Energy has a proven track record and unparalleled installed base in more than 140 countries. Headquartered in Switzerland, we employ around 40,000 people in 90 countries and generate business volumes of over \$10 billion USD..

Hitachi Energy is a leader in high-voltage technology, offering a wide range of high-voltage products up to 1,200-kilovolt (kV) helping enhance the safety, reliability and efficiency of power networks while minimizing environmental impact. Our technology leadership continues to facilitate innovations in areas such as ultra-high-voltage power transmission, enabling smart grids and enhancing eco-efficiency..

Power quality is a major concern for transmission and distribution utilities, industries, transport and infrastructure sectors. Poor power quality affects grid reliability, productivity, leads to higher operating costs and penalties for non-compliance with grid codes. Hitachi Energy is a technology leader with a wide range of products, systems and services that improve power quality including capacitors and filters, power electronics-based compensators and software solutions. The offering is available across the power value chain for low, medium and high-voltage applications, helping to shape sustainable, flexible and secure power networks.

Capacitors play an important role in power grids and electrical networks. They compensate reactive power in the electrical network and increase the power factor. This results in a more stable grid with increased transmission capacity and reduced losses.

The benefits of enhanced power quality can be seen across the power value chain:

CLMD capacitor units

Features and benefits

Hitachi Energy CLMD capacitors are your best choice for the most demanding applications, thanks to their rugged and flexible design.

Design

The building block of each CLMD capacitor unit is a capacitor winding. These windings undergo vacuum treatment to ensure consistent electrical characteristics. Each winding is then placed in a plastic case and encapsulated in thermo-setting resin in order to obtain a perfectly sealed element. Elements are combined together to form the capacitor unit.

Electrical characteristics

Dielectric losses are less than 0.2 Watt per kvar. Total losses, including discharge resistors, are less than 0.5 Watt per kvar. Available for single and three-phase systems. The elements are placed inside a box made of sheet steel and connected in such a way as to supply the single or three-phase power at the required voltage and frequency.

Safe performance throughout the capacitor's life

- The dry type dielectric makes the CLMD capacitors leakage free, minimizing the impact on the environment.
- The sheet steel box is filled with vermiculite which is an inorganic, inert and fireproof material that can absorb the

energy produced or extinguish any flames in case of a possible defect at the end of an element's life.

- In the event of a fault developing in the dielectric of the capacitor, the metallized electrode adjacent to the fault is immediately vaporized, thus isolating the fault. The capacitor then continues normal operation. This is commonly called the 'self-healing' principle.
- The capacitor windings are provided with a sequential disconnecter ensuring that each element can be reliably and selectively disconnected from the circuit at the end of its life.
- CLMD capacitors are provided with thermal equalizers to ensure effective heat dissipation. Discharge resistors are also included.
- The use of robust terminals minimizes the risk of damage during installation and reduces maintenance requirements.
- The capacitors comply with the requirements of IEC 60831-1 & 2.

High performance in-house metallized film

Hitachi Energy's completely integrated manufacturing process has resulted in the development of a special high-performance in-house metallized film from which all CLMD capacitors benefit. This film gives high breakdown strength, excellent peak current handling capability, and high capacitance stability and has an optimal self-healing design and a long life.

Construction of CLMD

CLMD capacitor units

CLMD 13

- Features**
- Modular and flexible
 - Easy parallel connection
 - Three M6 electrical terminals
 - Fixing: two slots (6.5 mm diameter)

Technical drawings

01 Front view

02 Side view

Technical specifications

CLMD

Voltage range	Up to 1000 V
Frequency	50 and 60 Hz
Connection	Three-phase as standard construction (single-phase on request)
Net output power	From 3.3 to 120 kvar
Tolerance on capacitance	0 % /+ 10 %
Losses (discharge resistors included)	Typically < 0.5 Watt/kvar for 380 V rated voltage and above
Discharge resistors	Permanently connected built-in discharge resistors are sized to ensure safe discharge of the capacitor to less than 50V in 1 minute after a switch off. Minimum time between disconnection and re-energization: 40 seconds
Maximum permissible current	1.3 x In for continuous operation
Tolerance on voltage	30% for maximum 1 minute (according to IEC 60831)
Case material	Zinc electroplated mild steel
Color	Beige RAL 7032
Fixing	CLMD13: with two slots, diameter 6.5 mm (suitable fixing for assembly in module) CLMD33S: with eight fixation holes, diameter 5.4 mm CLMD43-53-63-83: with two slots 26 X 12 mm
Weight	CLMD13: approximately 2.5 kg CLMD33 and CLMD33S: approximately 3.5 kg CLMD43: approximately 6 kg CLMD53: approximately 11 kg CLMD63: approximately 15 kg CLMD83: approximately 23 kg
Terminals	CLMD13: three M6 terminals CLMD33S: three cable outputs (6, 10, 16 mm ²), 50 cm long CLMD43-53-63-83: with threaded rods M6, 8, 10 or 12 according to the power of the capacitor
Minimum distance between units	CLMD13-33S: 20 mm (25 mm for units > 30 kvar) CLMD43-53-63-83: 50 mm
Minimum distance between units and wall	CLMD13-33 : 20 mm (25 mm for units > 30 kvar) CLMD43-53-63-83: 50 mm
Earth	CLMD13-33S: earth connection on the enclosure fixation CLMD43-53-63-83: a M8 terminal is included under the cover
Execution	Indoor (outdoor on request)
Maximum ambient temperature	Class „D“ (+55°C) according to IEC 60831
Minimum ambient temperature	Indoor type: -25°C Outdoor type: -40°C
Altitude	Up to 1000 m
Protection	CLMD13-43-53-63-83: IP42 (IP54 on request) CLMD33S: IP40
Cable input	By a knock out: CLMD13: 22.5 mm CLMD43-53: 37 mm CLMD63-83: 47 mm
Voltage test	Between terminals: 2.15 Un for 10 seconds Between terminals and earth: 3 kV for 10 seconds for UN < 500 V and 4 kV for 10 seconds for UN > 500 V
Lightning impulse voltage test	CLMD13-43-53-63-83: 15 kV CLMD33S: 8 kV
The acceptable overloads are those specified in IEC 60831-1&2	Overvoltage tolerance: 10% max. at intervals Overcurrent tolerance: 30% permanently Maximum overload: stable operation at 135% of the nominal rating (generated by overvoltages and harmonics)

IMPORTANT: The installation of capacitors on networks disturbed by harmonics may require special precautions, especially when there is a risk of resonance.

Hitachi Energy's commitment

Quality assurance

At Hitachi Energy, we are committed to providing the best products and services. Our products comply with or exceed the latest international standards. In addition to type tests in independent laboratories, our certified design and manufacturing processes guarantee the highest quality. We are certified according to the latest relevant ISO quality standards.

Sustainability

For Hitachi Energy, sustainability is about balancing economic success, environmental stewardship and social progress to benefit all our stakeholders. Sustainability considerations cover how we design and manufacture products, what we offer customers, how we engage suppliers, how we assess risks and opportunities, and how we behave in communities where we operate and towards one another, while striving to ensure the health, security and safety of our employees, contractors and others affected by our activities. We are certified according to the latest relevant ISO quality standards.
